EDUCATION

University of Toronto **Toronto, ON**

Honours Bachelor of Science, Computer Science Specialist, Statistics Major Expected May 2027

Relevant Courses: Computer Organization, Software Design, Multivariable Calculus, Machine Learning, Operating Systems, Databases, Computer Graphics, Stats & Data Analysis I/II, Data Science, Intro to AI

EXPERIENCES

WorldGuide AI **Toronto, ON**

Software Engineer Intern Jan 2026 - Present

- Building complex trip-planning and booking web/mobile features using **Next.js**, **React Native**, **Expo** and **Typescript**, while contributing across the **full software development lifecycle**, including testing, debugging, code reviews, and deployment
- Integrating third-party travel service APIs, handling asynchronous data fetching, loading states, and error scenarios

Vibes Meet LLC **Bronx, NY** (**Remote**)

Software Engineer Intern Aug 2025 - Nov 2025

- Built and refined **React Native** features and resolved bugs to improve app stability and user experience for **1k+ active users**
- Implemented UI/UX updates including redesigned tabs, dark mode support, unread notification indicators, posting progress indicators, page navigations, and fixed notification interactions to enhance responsiveness and user feedback
- Integrated **API-driven** insights and filtering logic to replace static data with real-time analytics, improving data accuracy
- Utilized CI/CD workflows with Github Actions to automate builds and linting with standardized commits and pull requests

University of Toronto, East Asian Studies Department **Toronto, ON**

Software Developer Sept 2024 - Present

- Surveyed existing Chinese learning apps and designed a React Native writing practice app using **React Hooks** to deliver mini lessons covering material from **8 EAS courses** to support student vocabulary practice, under Professor Yanfei Li
- Integrated multimodal APIs (e.g., **Expo Speech API** for audio), and **MongoDB** to store **150+ collections** of lesson data
- Built a React-based quizzing website to automate Chinese course placement tests for **500+ students annually**, using conditional logic to assign course levels, streamlining student assessment and **increasing efficiency by 90%**
- Documented technical architecture, API usage, and lesson data structures to support future student developers

Environics Analytics **Toronto, ON**

IT Intern May 2024 - Dec 2024

- Troubleshot technical issues for **200+** employees, resolving **100+ software/hardware issues** to improve team productivity
- Built Sharepoint pages for multiple departments using Microsoft 365 tools to streamline project tracking and file sharing
- Installed and configured data releases to support **5+ product launches**, ensuring smooth deployments and functionality
- Automated processing of assets, licenses, and employee data using **Alteryx** to enhance accuracy and efficiency

PROJECTS

Web Developer: UofT Women in Computer Science **Sept 2025 - Present**

- Enhancing and redesigning club platforms, implementing new features, and supporting UofT AI Ethics Hackathon website

Front End Developer: UofT Engineering Student Consulting Association **Aug 2024 - Present**

- Prepared mid/high-fidelity designs, developed club website, collaborated with executives to align features with club's needs

Wingterpreter | React, Javascript, Chakra UI, Python, Hugging Face, Roboflow, Google Colab **Jan 2025**

- Built an interactive game with computer vision and machine learning in **36 hours**, allowing users to learn and practice ASL

TECHNICAL SKILLS

Programming Languages: Python, Javascript/Typescript, Java, C++, C, SQL, HTML/CSS, R

Technologies/Libraries: React, React Native, Node.js, Express.js, Next.js, Django, Flask, RestAPI, PostgreSQL, MongoDB

Tools: Git, Bash, Linux, Jira, Docker, Postman, Alteryx
