EDUCATION

University of Toronto **Toronto, ON**

Honours Bachelor of Science, Computer Science Specialist, Statistics Major Expected May 2027

Relevant Courses: Computer Organization, Software Design, Multivariable Calculus, Machine Learning, Operating Systems, Databases, Interactive Computational Media, Computer Graphics, Stats & Data Analysis I/II, Data Science, Intro to AI

EXPERIENCES

Vibes Meet LLC **Bronx, NY (Remote)**

Software Engineer Intern Aug 2025 - Present

- Built new React Native features, fixed bugs, and improved app stability/user experience for **1k+ active users**
- Implemented reusable React Native components to improve development speed and code maintainability
- Collaborated in a **4-member team** using **Jira**, **Github**, and **Slack** to track issues, deliver solutions, and accelerate releases
- Utilized CI workflows with Github Actions to automate builds and linting to follow standardized commits/pull requests
- Participated in code/design reviews and provided feedback to improve code correctness and UI/UX consistency

University of Toronto, East Asian Studies Department **Toronto, ON**

Software Developer Sept 2024 - Present

- Surveyed existing Chinese language learning apps and designed a **React Native** Chinese writing practice app using React Hooks to support Chinese instruction in the EAS department, under the supervision of Professor Yanfei Li
- Developed mini lessons for students to practice vocabulary covering material from **8 EAS courses** offered
- Integrated multimodal APIs (e.g., **Expo Speech API** for audio), and **MongoDB** to store **150+ collections** of lesson data
- Built a React-based quizzing website to automate Chinese course placement tests for **500+ students annually**, using conditional logic to assign students' course levels, streamlining student assessment and **increasing efficiency by 90%**
- Documented technical architecture, API usage, and lesson data structures for future student developers

Environics Analytics **Toronto, ON**

IT Intern May 2024 - Dec 2024

- Troubleshot technical issues for **200+** employees resolving **100+ software/hardware issues**, improving team productivity
- Built Sharepoint pages for multiple departments using Microsoft 365 tools to streamline project tracking and file sharing
- Installed and configured data releases to support **5+ product launches**, ensuring smooth deployments and functionality
- Automated processing of assets, licenses, and employee data using **Alteryx** to enhance accuracy and efficiency

PROJECTS

Web Developer: UofT Women in Computer Science **Sept 2025 - Present**

- Enhancing and redesigning club platforms, implementing new features, and supporting UofT AI Ethics Hackathon website

Front End Developer: UofT Engineering Student Consulting Association **Aug 2024 - Present**

- Prepared mid/high-fidelity designs, developed club website, collaborated with executives to align features with club's needs

Wingterpreter | React, Javascript, Chakra UI, Python, Hugging Face, Roboflow, Google Colab **Jan 2025**

- Built an interactive game with computer vision and machine learning in **36 hours**, allowing users to learn and practice ASL

Datasphere: Environics Analytics | React, Javascript, Typescript, Python, Pandas, Alteryx **Jun 2024**

- Developed features to track daily tasks and flag issues, improving employee efficiency and accelerating problem resolution

TECHNICAL SKILLS

Programming Languages: Python, Java, Javascript/Typescript, C++, C, HTML/CSS, SQL, R

Technologies/Libraries: React, React Native, Node.js, Express.js, Django, Flask, RestAPI, Pandas, PostgreSQL, MongoDB

Tools: Git, Bash, Linux, Jira, Docker, Alteryx
