Re: Application/Software Developer Co-op (#2521242)

To whom it may concern,

I am writing to express my interest in the Application/Software Developer Co-op position at CIBC. As a fourth year Computer Science student with an interest in software development, I look forward to enhancing my skills in coding, testing, reviewing projects in a team environment through an internship.

During my work study, I conducted research on several popular language learning apps including Duolingo, Pleco and Arch Chinese. I also developed a website/app using React Native in Typescript and Expo Go, designed to help students learn/practice writing Chinese characters tailored to each course. Databases played a huge role in this project as I had to design a database to store the different characters and lesson content in an efficient way. I used MongoDB and MongoDB Shell to accomplish this. Some other technical aspects included an open-source Javascript library, API calls, etc.

In my previous IT internship at Environics Analytics, I was able to enhance my problem solving skills by working through various tickets and preparing a list of possible solutions. Self learning was another big part of this internship for finding solutions to technical issues as well as learning how to create/update Sharepoint pages based on colleagues' requirements. Over the course of my internship, I also collaborated with colleagues to develop a React website to keep track of tasks, inventory, cost predictions, etc.

Furthermore, I have recently worked in a team setting with multiple exposures to surveying tools. For my CSC318 course, I worked in a group of 6 to produce a prototype in Figma with the goal of reducing e-waste among undergraduate students. We conducted 3 field studies to determine the design requirements as well as the usability of our paper prototype and high fidelity prototype, using results to make adjustments and further improve our product.

Thank you for reading my cover letter and resume. I look forward to discussing this opportunity further. I can be reached by email at aanniexwang@gmail.com or by phone at 905 208 7685.

Sincerely,
Annie Wang
